Late April offers the opportunity to enjoy the impressive diversity of bird species found in the Mediterranean region, particularly around the Camargue delta.

Your guide, Christophe Giraud, is passionate about the natural heritage of the Camargue–Crau–Alpilles region. For over 20 years, he has been leading guided tours to explore the richness of this remarkable Mediterranean landscape. With a scientific background, he has extensive experience in ornithology, as well as a broader knowledge of the region's fauna and flora. He will also introduce you to geomorphology, hydrology, history, and traditional activities.
